Further Information

I am interested in giving more reflective thoughts into becoming better as an Educator. Working in an educator capacity formed part of my activities as an Information Technology professional, Student and Researcher at the University of Huddersfield.

I have been creating and delivering talks and curriculum for software and software engineering courses. I have been part of the committee for developing new courses and Programmes in the School of Computing and Engineering.

I have in the past partly developed a course in Machine Learning. I am currently working on a course in Software Engineering design patterns. The blog can be found at <https://github.com/SoftTouchSolutins/pattern-a-day/wiki>.

I have been a part of laboratory teaching assistance at the University of Huddersfield for courses including introduction to application programming and database design during my PhD research degree.
