CFS2160: Programming Stream

Tutorial/Practical 10

Have a Good Holiday

Introduction

Time for relax for a bit.

Activities

You are welcome to use the practical time to ask any remaining questions you may have about what we have done this semester.

Then pick and choose[1]:

1. The Google Doodle from 4th December is a programming challenge. It starts easy, but gets really quite tricky. Can you do each level in the minimum number of blocks?
   https://www.google.com/doodles/celebrating-50-years-of-kids-coding
2. Let It Go!
   https://hourofcode.com/frzn
3. Combat.
   https://hourofcode.com/cocom
4. Flappy.
   https://hourofcode.com/flap
5. The slightly more seriously minded might want to try:
   https://www.codewars.com/
   (A "Code Kata" is a small exercise that helps keep the programming mind ticking. There are some simple ones in there. Have a go.)

See You Next Year.

---

[1] There's a serious point to this. The principles in all these activities are precisely the same as the ones we have done in the module so far.
